

## Crossbeam® X45 Starter Kit Bundles

### Think You Can't Afford To Consolidate?

The X45 Starter Kit Bundles offer two ways to reap all the unique benefits of the X-Series platform at a very affordable price.

Consolidate your security needs into a single platform from Crossbeam with security applications from leading security vendors, including Check Point, Sourcefire, IBM, Imperva, Trend Micro, Websense, and start to save.

### Two new starter kits; up to 60 percent off suggested list price:

Crossbeam offers two new bundles, both based on Crossbeam's X-Series platforms. Either kit should be ordered with the corresponding maintenance sku noted below.

Both X45 based starter packages include new 4<sup>th</sup> generation application and network blades with up to 5 Gbps of network traffic throughput.

The "4 core" processor based bundle is perfect for adding firewall services to network perimeter and extranets.

The "8 core" processor based solution enables high performance applications such as intrusion detection and prevention and leverages sequenced applications deploying Check Point Security Gateway and IPS/anti virus applications from Sourcefire, IBM, Imperva and Trend Micro.

With each of these bundles, support is just a click away. Just be sure to order the maintenance sku highlighted below, for either bundle. Crossbeam's Premium Direct Technical Support delivering 24 x 7 round the clock support, advanced hardware replacements and immediate access to Crossbeam Knowledge base portal. This support insures your Crossbeam network security assets stay up and running as they protect your corporate assets.

Product Code	Description
X45-KIT-4CORE	X45 chassis with 1 NPM-8620, 1 4CORE APM-8650, 1 CPM-8600, 2 1200W PSUs
X45-KIT-8CORE	X45 chassis with 1 NPM-8620, 1 8CORE APM-8650, 1 CPM-8600, 2 1200W PSUs
CBS-CT-X45KIT-PREM*	Premium Direct Support via Crossbeam (4-CORE or 8-CORE KIT)

\*Support also available through a Crossbeam CASP-Support Partner

## BENEFITS

- ▶ Linear Scalable performance- simply add additional application processors for enhanced performance.
- ▶ Start with 5 Gbps throughput today and easily scale to 20 Gbps throughput through extra network processors security solution
- ▶ Backplane is "change-ready" to 80Gbs
- ▶ Supports multiple security applications (firewall, IPS, antivirus) working together to protect the network from harmful breach
- ▶ Crossbeam's Premium Direct Service assures round the clock support for your valuable network security assets.
